### Operations

- External Exams began today. Best wishes to our year twelve cohort.
- DayMap is slowly filling with data, and I'll hopefully test it with some of you very soon, with half of our Admin officer team and I in training today and the rest attending training soon, with a few people attending other training on Wednesday.
- School Hall, no news at this stage. The tenders should have closed recently, and we are waiting to work with the winning contractor.
- Enrolments continue to grow steadily across the College.
- Restorative Justice training has begun with our team mid-way through pre-training surveys to gauge their understanding and mindset.

### 2023 Mission, Vision, Focus and Strategies

- I want to read through our draft mission, vision, focus and strategies with you. Education Queensland released its draft two weeks ago.
- We have adjusted ours (designed in 2014) to reflect the current education climate. This document is a draft.

Are there any questions from my report?

<i>Prep to Year 02 – Starting Strong</i>	<i>Years 03 to 09 – On track for Success</i>	<i>Years 10 to 12 – Ready for the Future</i>
<i>Students who attend school regularly, are engaged in the classroom and progress in their learning are more likely to have better outcomes across their entire schooling journey.</i>	<i>Evidence tells us that maintaining learning in upper primary and junior secondary is crucial to keeping students at school and moving in the senior schooling years.</i>	<i>Effectively planning and monitoring every student learning pathway through their senior schooling and post-school destination keeps students on track to achieve successful outcomes.</i>

Brief description of the item to be purchased or activity to be undertaken:	Refurbishment of robot battery	
Brief description of how this project will support the objectives of the P&C:  Promote the interests of the College to facilitate the development and further improvement of the College.	<p>This is an extension of my Makerspace project, implemented in Term Three.</p> <p>Funding for this project will enable me to ensure existing school resources are being used to their potential. The robot owned by the school is not able to be used at this time, as the battery doesn't work. After some investigation, I have discovered that the battery can be 'refurbished' for considerably less than the cost of a new battery (approx \$3,000), and will enable the robot to be used.</p>	<b>P&amp;C Evaluation</b>
Proposed benefits to the students, staff and/or community:	Refurbishing the battery will allow students to learn coding skills, and program the robot to carry out commands, perform specific movements. Opportunities will be given for students to showcase their learning to peers and others at various times throughout the year.	
Funding amount requested:	<b>\$527.90</b>	
Brief description of sustainability:  Will more funds be required at a later date?	No need for additional funding is anticipated. Students will use the robot only under supervision, to limit the risk of accidental damage.
